THE MURTI — THE VERTICAL GRAMMAR

RTAM · shivling3 study · declared design dimensions — the drawing is an illustrative ¾ perspective, not to scale

$$169 = 109 + 29 + 31 \quad \cdot \quad \text{jalādhārī } 38 \text{ in total} \text{ — } 9 \text{ in the water, } 29 \text{ in visible}$$

PLATE I — THE VERTICAL GRAMMAR

THE VERTICAL GRAMMAR — THE NUMBERS ●

TOTAL VISIBLE HEIGHT	169 IN	7	the whole — 13 ²
ŚIVALIṄGA ABOVE THE LOTUS	109 IN	1	the axis
JALĀDHĀRĪ, TOTAL	38 IN	2	the vessel
ABOVE THE WATER, VISIBLE	29 IN	2	38 – 9 = 29
STANDING IN THE WATER	9 IN	—	the silent nine
PODIUM (GROUND TO RIM TOP)	31 IN	4	form · support
WATER BASIN, STONE DEPTH	9 IN	—	silent
OUTER PODIUM DIAMETER	Ø 187 IN	7	the field

The stack: 169 = 109 + 29 + 31. The code: 7 = 1 + 2 + 4 (whole = axis + vessel + form).

To be explicit: the jalādhārī is 38 in tall in TOTAL. 9 in of it stands below the water inside the basin, so 29 in shows above the water. 38 – 9 = 29.

Dictated '165.69' read as 169 — the locked total; the stack confirms it.

On record, not yet ratified (GRAMMAR.md §2b): the silent-nine shift — podium 40 · jalādhārī 29 (20 above the rim) · floor 31 — same total, every digit root unchanged.

Waterline open: 38 in (water depth 7, freeboard 2) — or brimful at the rim.
